

Enhanced Recovery Stent Pathway

Preoperative

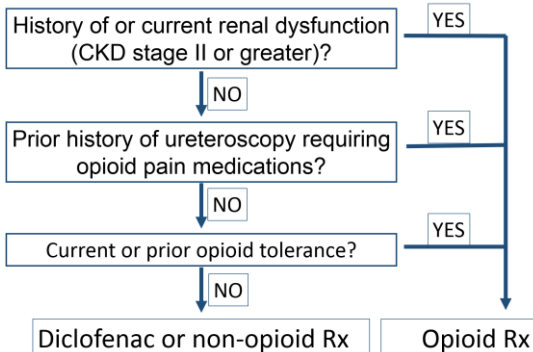

Counseling

- Reason for stent
- Treatment timeline – stent removal
- What to expect – stent symptoms
- Use of NSAIDs
- Worrisome signs / when to call

Determine eligibility for non-opioid:

Treatment Algorithm

Preoperative evaluation and/or chart review:

Intraoperative

At Time Out

- Non-opioid plan discussed
- Ketorolac 15-30mg IV
- Min. narcotics if possible

Postoperative

Discharge Prescriptions

- Diclofenac 50mg BID PRN x 4 days
- Flomax 0.4mg QD through stent removal
- Pyridium 200mg TID PRN x 3 days
- Tylenol 1000mg q6h PRN

Instructions

- Discharge Instructions template
- PACU nursing verbal instructions
- Reiterate stent symptoms

If selected out of non-opioid pathway

- Judicious PO opioid (oxycodone, etc.)
- Flomax 0.4mg QD thru stent removal
- Pyridium 200mg TID PRN x 3 days
- Tylenol 1000mg q6h PRN
